SUPPLEMENTARY INFORMATION: The Indian Gaming Regulatory Act established the National Indian Gaming Commission which is charged with, among other things, regulating gaming on Indian lands.

The regulations of the Commission (25 CFR part 500) provide for a system of fee assessment and payment that is self-administered by the gaming operations. Pursuant to those regulations, the Commission is required to adopt and communicate assessment rates; the gaming operations are required to apply those rates to their revenues, compute the fees to be paid, report the revenues, and remit the fees to the Commission on a quarterly basis.

The regulations of the Commission and the final rates being adopted today are effective for calendar years 1991, 1992, 1993, 1994 and 1995. As a result, the Commission shall credit each gaming operation pro-rata fees collected in excess of \$1,500,000 during those years. The Commission will notify each gaming operation as to the amounts of overpayments, if any, and therefore the amounts of credit to be taken against the next quarterly payment(s) otherwise due.

Title of Collection: 2000 Survey of Scientific and Engineering Research Facilities at Colleges and Universities.

OMB Control Number: 3145-0101.

Proposed Renewal Project: The current National Science Foundation Survey of Scientific and Engineering Research Facilities at Universities and Colleges has been in use for two years. Data were collected from a sample of 365 institutions to examine the status and need for science and engineering research facilities at universities and colleges as directed by Public Law 99-159, and from a sample of 100 nonprofit research organizations and hospitals. It was expected by Congress that this survey would provide data necessary to formulate appropriate solutions to documented needs, as well as provide trend data necessary to evaluate outcomes of approaches that might be implemented. The proposed Follow-Up survey will collect additional information to supplement the original survey data, increasing its usefulness to Federal agencies, policymakers and higher education administrators. Total project construction costs which exceed \$25 million per project will be reported and particular space designation measurements (e.g., net assignable square feet) of the building will be identified.
